Career Objective

A motivated and detail-oriented B.Tech student with a strong foundation in programming, problem-solving, and software development, seeking an opportunity as a Software Developer. Eager to apply technical skills in Java, data structures, and web technologies to build efficient and innovative solutions while continuously learning and contributing to a collaborative development team.

Education	Bachelor of Technology (B.Tech) - Information Technology 2023 (Present) – 8.2 CGPA St. Thomas Aquinas Matric High School, Kodaikanal, Tamil Nadu Secondary (2020) - 100% Higher Secondary / HSC (2023) - 85%
------------------	---

Skills	Programming Languages: Java, JavaScript, SQL, HTML, CSS Tools & Frameworks: LangGraph, OpenAI API Concepts: OOPS, LLM Engineering (Prompt Engineering, PII Redaction, Response Validation)
---------------	---

Internship	Web Design - Front-End Design Intern - Jan 2025 - Feb 2025 - Collaborated with developers on design feasibility, delivered clean design specs, and built static web pages with HTML, CSS, and JavaScript. Web Development - Front-End Developer Intern - Nov 2025 - Dec 2025 - Developed and tested interactive JavaScript components for client projects; wrote SQL queries to connect front-end forms to PostgreSQL databases for data storage and retrieval.
-------------------	--

Project	Smart Campus Resource Booking System - Web-based booking platform with admin approval workflow built on Node.js, Express.js, and PostgreSQL - reducing scheduling conflicts and streamlining resource management. AI Ticket Classifier - Production-grade LLM pipeline using LangGraph and OpenAI API that auto-routes support tickets by category, priority, and sentiment - with PII redaction, injection and defence.
----------------	---

Certifications	Prompt Engineering for ChatGPT - Coursera Internet of Things - Swayam NPTEL
-----------------------	--
